Profile

Results-driven Frontend & Full-Stack Developer with 4.6 years of experience building scalable web applications using React.js, Next.js, TypeScript, and Angular. Skilled in creating reusable components, optimizing UI performance, integrating REST APIs, and implementing AI-powered features to improve user experiences. Proficient with Material UI, Webpack, Vite, and Core Web Vitals. Experienced in Microfrontend architecture, Agile/Scrum, CI/CD pipelines, AI driven development, and cloud deployments.

Core Strengths: React.js | Next.js | TypeScript | Angular | Node.js | REST APIs | Unit Testing | AI | Performance Optimization | Accessibility (WCAG) | Material UI | Microfrontend (MFE) | AWS | Prompt Engineering | Agile/Scrum

Work Experience

Phenom People

2025 – Present

Product Development Engineer I (Frontend / Full-Stack Developer)

Hyderabad, Telangana, India

- Engineered a CRM Campaign & Messaging Platform handling Voice, SMS, WhatsApp, and Email communication through Twilio APIs.
- Built responsive user interfaces and real-time workflows, improving user engagement and platform reliability.
- Implemented prompt engineering techniques for AI-driven messaging, enhancing automation and content relevance.

Divami Design Labs

2022 – 2025

Software Engineer (Frontend Developer)

Hyderabad, Telangana, India

- Delivered Blue Yonder SaaS dashboards using React.js, Highcharts, and Material UI for analytics and planning applications.
- Built reusable components and optimized API integrations for improved maintainability and application performance.
- Strengthened testing frameworks using Jest, Enzyme, and WebdriverIO, achieving 95% coverage and stable production releases.

Projects

CRM Messaging & Campaign Platform

2025 – Present

- Developed an omnichannel campaign system using Angular, REST APIs, and Twilio for automated Voice, SMS, WhatsApp, and Email communication.
- Designed tenant-based configurations and campaign templates, streamlining personalized outreach.
- Optimized API response times with caching and lazy-loading strategies for better performance.

Autonomous Business Planning App

2022 – 2025

- Built dashboards and visual reports using React.js, Highcharts, and Material UI, enhancing analytics visibility.
- Integrated real-time REST APIs and GraphQL endpoints for responsive and accurate business data.
- Ensured WCAG accessibility compliance and optimized Core Web Vitals for an improved user experience.

Education

Bachelor of Technology in Engineering

2018 – 2022

Parala Maharaja Engineering College

Odisha, India

Higher Secondary (Science)

2016 – 2018

Arihant Junior College

Odisha, India

Skills

Frontend: React.js, Angular, Next.js, Redux, Material UI, Highcharts, HTML5, CSS3, JavaScript, TypeScript, Webpack, Vite, Prompt Engineering

Backend: Node.js, Express.js, REST APIs, MongoDB, Java, Springboot, Kafka, Agentic AI

Testing: Jest, Enzyme, React Testing Library, WebdriverIO, Selenium, Robot Framework, Playwright

DevOps/Cloud: Docker, Jenkins, AWS (EC2, S3), Firebase, CI/CD Pipelines

Tools: Git, GitHub, Bitbucket, Cursor, Copilot, Bitbucket, JIRA, Confluence, Agile/Scrum
